

## Ph.D. Student Position

Would you like to get **new insights into climate change** by adding new key mechanisms into a global climate model?

Required:

- B.Sc. or M.Sc. degree in climate science, meteorology, physics or physical oceanography. Recipients degrees in engineering and computer science will also be considered.
- Good computing skills, including programming.
- Good English skills (both writing and speaking).

**Considered an advantage: Good knowledge of atmospheric physics and dynamics and advanced skills in working in a Linux environment**

**If you want to hear more about this please email us:**
